

MANISHWAR REDDY CHANDUPATLA

Cyber Security Analyst | VAPT Enthusiast

Hyderabad, India | +91-8309849914 | manishwarreddychandupatla@gmail.com | Portfolio

CAREER OBJECTIVE

Recent graduate with a Bachelor's degree in Computer Science and Engineering and a strong interest in cybersecurity. I have developed hands-on experience with security tools such as Kali Linux, Nmap, Wireshark, Metasploit, Burp Suite, and OWASP ZAP through academic projects and practical lab work. I enjoy understanding how systems and applications can be secured, identifying vulnerabilities, and learning how attackers and defenders approach security. I am looking for an entry-level opportunity in Cybersecurity, SOC, or VAPT where I can apply my skills, continue learning, and contribute to a security-focused team.

EDUCATION

Bachelor of Technology – Computer Science & Engineering 2022 – 2026

University College of Engineering and Technology, Mahatma Gandhi University – Nalgonda

TECHNICAL SKILLS

Security Tools: Kali Linux, Metasploit Framework, Wireshark, Nmap, Burp Suite, OWASP ZAP

Networking: TCP/IP, DNS, DHCP, OSI Model, Network Protocols, Packet Analysis, Firewalls, VPNs

VAPT Concepts: Vulnerability Scanning, Penetration Testing Methodology, Reconnaissance, Exploitation, Reporting

Web & Application Security: OWASP Top 10, Common Misconfigurations, Basic Secure Coding Practices

Security Fundamentals: Cryptography Basics, Authentication & Access Control, Malware, Incident Response Concepts, SIEM Awareness

Scripting & Programming: Python, Bash Scripting

Operating Systems & Platforms: Linux (Kali, Ubuntu), Windows, Git/GitHub, Cloud Security Basics (AWS)

Awareness of Standards: ISO 27001, NIST Framework, CIA Triad

KEY COMPETENCIES

- Network traffic analysis and packet inspection using Wireshark
- Vulnerability identification and exploitation using Metasploit Framework
- Proficient in Kali Linux environment for security testing workflows
- Understanding of TCP/IP networking fundamentals and common attack vectors
- Knowledge of OWASP Top 10 vulnerabilities and mitigation strategies
- Basic understanding of web application security and common misconfigurations
- Familiar with reconnaissance, scanning, and reporting stages of the penetration testing lifecycle
- Quick learner, comfortable picking up new security tools, frameworks, and attack/defense techniques

ACADEMIC PROJECTS

Network Vulnerability Assessment – Academic Project

- Performed network scanning and enumeration in a controlled lab environment using Nmap and Wireshark
- Identified open ports, running services, and potential vulnerabilities in the test network
- Documented findings and proposed remediation strategies based on industry best practices
- Followed a structured VAPT methodology covering reconnaissance, scanning, and reporting phases

PERSONAL STRENGTHS

- Self-motivated learner with a keen interest in cybersecurity research
- Strong analytical and problem-solving skills
- Ability to work independently as well as collaboratively in a team environment
- Quick to adapt to new tools, technologies, and work environments
- Good written and verbal communication skills
